

TIME FOR A CHANGE?

An estimated 200 million gallons of used oil ends up in our nation's waterways - the equivalent of 19 Exxon Valdez oil spills.

Recycling your oil is easy as . . .

1. Remove the drain plug from the bottom of your car's oil pan and allow the oil to drain into a clean, reusable container no larger than five gallons. Don't mix used oil with any other liquids, such as gasoline or antifreeze.
2. Use a filter wrench to loosen the oil filter, then spin it off and let the oil drain into the oil recycling container. Once the filter has completely drained, seal it in a plastic bag, and bring it to a collection center with your used oil. Not all centers accept filters. Check first!
3. Take your used oil to one of the City of Pomona's Certified Used Oil Collection Centers. For locations call 1-800-CLEANUP.
